

# IPOWER TOWER™

The most versatile solid state thermoelectric power generator in the sub \$150USD Category

**- Adaptive to any heat source w/propane and vapor being the best!**

The new standard in Thermoelectric cell phone charging, tablet charging with dual battery charging up to **13.8V for Charging 12V batteries** using sterno, alcohol or propane fuel, wood chips can also be used to fuel the **IPower tower™** a patent pending fully passive Thermoelectric Generator design. Culminating from 25 years of thermoelectric experience. Absolutely, no moving parts! **Exceptional** power output with the ability to supercharge (**5V@1.2 amps**) you cell phone, while also charging any size battery up to 12V. No other small TEG Generator on the market has this kind of power.

Youtube has a number of technical videos demonstrating its performance. **No** Gimmicks, **No** slick marketing just POWER WHEN YOU NEED IT!

The TEG Generator System comes with a custom controller with dual output. A 5V USB charging port and a universal screw terminal that can be wired simultaneously to charge any battery from 1.2v up to 12v and also run LED lighting in emergency situations.

The **IPower tower™** is portable and easy to use. Has a patented "**Power Booster System™**" uniquely designed to power boost the output during operation. Charges a 12V battery or any battery from 1.2v, 1.5v, 6V, 9V, 12V. Without any chance of overcharging your battery **GUARANTEED!**

With today's power hungry smartphones and rapid charging power requirements the **IPower tower™** is uniquely designed to charge devices rapidly at the same rate as a wall charger in your home can provide. Unlike many other so, called TEG charging designs that are slow and provide very little charging current. The **IPower tower™** offers up to 1.2amps of current at 5V.

The TEG Generator is available in 4 unique colors. **Silver on Black, Blue on Black, Black on Black and Green on Black.**

# IPOWERTOWER™

## Features:

- No moving parts!
- Dual output 5V USB plus universal terminal for charging any battery up to 12V or LED lights!
- Ability to charge a tablet as if it was plugged into a wall socket!
- Available in 4 color!
- Portable!
- Ability to charge indoors using the proper fuel! Alcohol based fuels ONLY!
- Easy to fill and equally easy to empty? Once filled would last up to 3 days continuous use!
- Top quality attractive look all aluminum anodized finish!
- Extremely safe to use!
- Easy to set-up and operate!
- Security features!
- Operates using multiple fuels!
- Power Booster System™
- Able to charge any apple phone or tablet using a **Turbo Current Booster** free!

## Specifications:

- 10 watts nominal
- Dual outputs 5V and 1.2V-12V variable based on battery voltage.
- 1.5 liter water cold side chamber
- 80mm clearance for up to 5oz fuel can or propane burner supplied **FREE!** Just request!
- Easy empty feature with tap on side
- 8 lbs gross weight
